

FOR IMMEDIATE RELEASE

Vertex Launches Accelerator+ for SAP ERP, Delivering a Unified Global Platform to Navigate Tax Complexities

Simplified functionality and enhanced operational efficiency for SAP businesses operating domestically and globally.

KING OF PRUSSIA, PA – June 3, 2024 – [Vertex, Inc.](#) (NASDAQ:VERX) (“Vertex” or the “Company”), a global provider of tax technology solutions, today announced the launch of Vertex Accelerator+ for SAP ERP – the next generation tax management tool that combines the features of Vertex Accelerator and Vertex Chain Flow Accelerator into a single consolidated global solution. This innovative solution offers a comprehensive and intuitive interface, simplifying and unifying setup, configuration, reporting and tax management for all global and domestic needs. Accelerator+ enables business growth by streamlining tax processes, facilitating cloud transformation initiatives and establishing a solid foundation for any current or future migration to S/4HANA.

With the rise of digital transformation across various industries, businesses are facing common scalability challenges – including inaccurate tax calculations, manual data handling, compliance concerns and rising costs. Accelerator+, deployed either with Vertex O Series tax engine or Tax Decision Tool for VAT, simplifies these complexities for SAP ERP customers managing global supply chains. The solution provides a multitude of essential features, providing centralization, advanced reporting, geo-location identification and an improved goods movement solution for tax accruals.

“Accelerator+ reflects our dedication to simplifying tax automation and compliance for SAP customers by improving capabilities and usability while reducing complexity and costs. Ultimately, we are providing customers with the necessary technology to support their adoption of SAP S/4HANA,” said Brian Wilchusky, Senior Director of SAP Global Partnerships at Vertex. “Vertex remains committed to assisting SAP customers in achieving positive outcomes and realizing the goals of their business and process transformations.”

Existing customers will have the flexibility and support to utilize the solutions within their current portfolio until their decision to migrate at a time that suits their needs.
