

Vertex and Microsoft Dynamics 365 Business Central

Sales and Use Tax Determination

Improve tax determination with Vertex

Vertex provides powerful, automated tax determination for Microsoft Dynamics 365 Business Central. A seamless turnkey integration delivers real-time tax calculations based on continually updated tax content and precise location determination for improved accuracy and efficiency.

Robust Integration

Vertex provides seamless integration to Microsoft Dynamics 365 Business Central, simplifying sales and use tax determination on AR and AP transactions without constant Microsoft system updates. Address cleansing and precise tax jurisdiction assignment relieves the need to manually populate and manage tax area codes within Business Central. The integration works with both Business Central versions, Essentials or Premium, and all necessary modules, including Sales, Purchasing, or Service Management. Developed and maintained by Vertex, the integration also offers flexible deployment options.

Deploy on Microsoft Azure Cloud

Take advantage of flexible deployment options to co-locate both your D365 ERP and Vertex O Series tax calculation engine on the Microsoft Azure cloud platform.

- **Improve performance** by placing your tax calculation engine on Microsoft's high-speed global network.
- **Increase reliability** and recovery by utilizing Microsoft Azure's built-in high availability and disaster recovery solutions.
- **Maximize spend** by using Microsoft Azure Consumption Credits (MACC)* to purchase Vertex O Series on Azure, Vertex O Series Edge, ERP applications, and services.
